Link Images to other applications! Even search and view images online.

Create visual punch-lists, reduce travel, expenses, and time !

<p><b>Acquire images from any source! Annotate your images with notes, redline layers, user defined search fields, voice, keywords, and many more features!</b></p>	<p><b>You take the time to take a picture, you do it for a reason, then you bury it into an unsecured folder where it gets deleted, changed, moved, and can't be found!</b> <b>Isn't it time for a change?</b></p>	<p><b>Imagine having the ability to see and manage all of your projects across town, or across the world right from your PC! Find images instantly &amp; share them with anyone. anywhere!</b></p>
---	--	--

Take control of your projects now. *Good visual documentation is the most important form of documentation you can have. It is not subject to interpretation like written documentation.* Make better decisions by having reliable secure visual information available immediately. Save time, frustration, and make more profit! When the blame game and finger pointing start you will be able to instantly go back in time and "SEE" exactly what occurred and when!
